

Congressman Jim Matheson...

Matheson sided with special interests...**hook...
line...and sinker.**

We need change in our nation's energy policy. We can move the clean economy forward, create jobs, reduce dependence on foreign oil and safeguard our natural resources.

Hunters and anglers know that the Clean Energy and Security Act means protecting our natural heritage – enjoying the outdoors with our children and grandchildren.

It's a shame, that Rep. Matheson sided with the special interests instead of siding with sportsmen when he voted against the Clean Energy and Security Act.

PAID FOR BY THE NATIONAL WILDLIFE FEDERATION ACTION FUND.
